To Whom It May Concern:

I am writing to recommend the services of POST Integrations. Having been in the hotel industry for nearly thirty years as Treasurer and Controller for large management companies with portfolios of various branded hotels I consider the decision to engage the services of POST Integrations one of the most rewarding I have made during my career. The complexity of setting up new merchant accounts for hotel acquisitions and the coordination of efforts with PMS, POS and Gateway service providers requires a great deal of attention and follow through. POST Integrations specializes in providing merchant processing for the hospitality sector and is highly regarded by the support teams at the various PMS and POS providers. Juli Barter, Director of Client Relations for POST is personally involved throughout the process to ensure that her client's expectations and deadlines are met in a satisfactory manner. POST takes a hands-on approach to monitor the transaction activity for each of our locations daily and follows up with a phone call to the hotel if settlement activity hasn't occurred.

POST Integrations offers top-notch quality, service and rates. In every aspect, we are always pleased with their work. Please consider POST Integrations for all your credit card processing needs. If you have any questions, feel free to contact me.

Sincerely,

A handwritten signature in blue ink that reads "Phillip Hale". The signature is fluid and cursive, with a long horizontal stroke at the end.
